Quantum Science and Technology (Master Degree)

Universitat de Barcelona

Dear College of the Admissions Office,

It is my pleasure to recommend Mireia Tena for admission to your Master Degree in Quantum Science and Technology without any reservation.

I have known Mireia for the past three years, having been her professor of two compulsory subjects during her graduate studies in Physics: "Modern Physics" in the second year and "Solid State Physics I" in the fourth year. During the last term, she is finishing the Bachelor's Degree Final Project under my supervision.

Mireia has been one of the most active participants in class discussions and practical sessions. She has very good written and verbal communication skills, being above the average of the students in the group.

Mireia is not only intelligent and capable, but she has always demonstrated a positive attitude, initiative and ability to work both independently and in a team.

If you have any questions regarding Mireia's background or qualifications, please do not hesitate to contact me at +34 946 015 409 or luis.elcoro@ehu.eus.

Sincerely yours,

Prof. Luis Elcoro

To whom it may concern:

It is a pleasure to provide this letter of recommendation for Ms. Mireia Tena Zuazolacigorraga (ID:73031942L). I am writing as a Senior Researcher and Ms. Mireia's internship supervisor.

Ms. Mireia joined the *Basque Center for Materials, Applications and Nanostructures* in the beginning of March for a three-month long internship. During her stay, she has shown great interest and motivation for research. Ms. Mireia is very curious, talented and hardworking. She has proved to be responsible and reliable, and has expressed special interest in fundamental science.

All things considered, I genuinely believe Ms. Mireia is an excellent candidate for the master's program in *Quantum Science and Technology*. I also recommend her to any research centre that would like to have her as an intern.

I remain at your disposal for any further request.

Yours sincerely,

Daniel Salazar
Senior Researcher
