About me: I am a physicist that continued his career in the company world. I was looking for a hard working place where I could grow and contribute to society. During these years I have been in different projects, but something was missing, making it difficult to relate to them meaningfully. The joy and fulfillment that I had while working on hard problems during my physics degree, trying to understand the world around me, is something I have not been able to replicate. I want to give a chance to science and research and see where this takes me.

● WORK EXPERIENCE

08/2018 – CURRENT

SAP CONSULTANT – ERNST & YOUNG

In this company I started as an analyst consultant, designing the new features for a SAP based product in the hospitality industry (TMS) and working on the unsolved problems of the time. My interest in programming grew the more I knew about the programs we were building and I ended up joining the programming team. Now I have been programming in ABAP for 2 years.

Barcelona, Spain

09/2016 – 08/2018

PROGRAMMER CONSULTANT – BETTER CONSULTANTS

I worked as a programmer and as a consultant. I learnt data base structures, Oracle PL/SQL and Java with projects such as:

- Data migration: Analysing the new schema and creating a model to migrate the data from two databases to a new system of guarantees.
- Bank data auditory: Analysing the data in order to create the indicators and KPI for internal and external audits as well as the reporting system needed.

Barcelona, Spain

10/2014 – 10/2015

PRESIDENT – BEST BARCELONA

I joined this organization in 2013 and there I saw the importance of teamwork and the communication that should go with it. Taking responsibility made me more conscious of how people and organizations work and I had to develop my leadership and planning skills in order to fulfil the mission of the positions I worked on. My grades were affected by this project, but the personal growth was worth it. I also had the opportunity to travel to more than 15 countries and work in international projects.

● EDUCATION AND TRAINING

2011 – 2016 – Cerdanyola del Vallès, Spain

PHYSICS DEGREE – Universitat Autònoma de Barcelona

This degree brought me into a new level of analytical thinking. I did a lot of math and worked on very abstract concepts, which has given me the ability to learn new ideas and confront difficult problems, even when not having all the tools required.

02/2018 – 03/2018 – Barcelona, Spain

JAVA SE 8 FUNDAMENTALS – PUE

30h course on the fundamental Java concepts.

● **COMMUNICATION AND INTERPERSONAL SKILLS**

Languages

Spanish - Native
Catalan - Native
English - C1 level
