

Letter of Support Pablo Rodriguez Grasa,

Pablo was my student in computational physics he was fairly participative. He got an 8.5/10 which makes him upper 20% of a class of 100. Currently I am supervising his TFG on the coding of Grover search algorithm on the IBMq machines. He is very enthusiastic, with an eye on economic issues (he likes the stock market apparently). He is highly motivated to enroll the master. From my interaction with him he is fairly smart and fast, he is also nice to talk to.

I support his application

Bruno Julia Diaz
